Service Projects

Red Rock Quilters give comfort, care, and a personal touch to people and animals throughout the greater Sedona area. Through our service projects, guild members create handmade items that are donated to local organizations and individuals in need.

Clothing Protectors*
Our clothing protectors are wearable accessories designed to shield the chest and lap from food spills, liquid drips, and stains during meals. They are useful in healthcare, assisted living, and home-care settings, helping maintain cleanliness while preserving comfort and personal dignity.

Placemats for Meals on Wheels
We create handmade fabric placemats for **Meals on Wheels**, giving homebound seniors a cheerful and personal touch at mealtime. These colorful mats help brighten everyday meals and remind recipients that their community cares about them.

Pet Beds for the Humane Society
Our guild makes durable, comfortable pet beds for the **Humane Society**. Designed to be safe, washable, and practical for a busy shelter environment, these beds provide warmth and comfort while helping reduce stress for animals waiting for their forever homes.

Walker Bags*
Walker bags provide convenient, hands-free storage for people using walkers, rollators, and wheelchairs. With compartments for essentials such as water bottles, phones, glasses, medications, and books, these handmade bags make everyday items easier to carry while supporting mobility and independence.

Pillowcases
Pillowcases are made and distributed to the siblings of children undergoing cancer treatment. Through this project, we support the work of **CHAMP** and provide something special and comforting for children whose families are going through a difficult time.

Labels for Service Projects
Use this label for all Service Projects. This label is available at the meetings. Please see Theresa Frank to acquire this label and for patterns for items with an “*”.

Through every project, Red Rock Quilters is proud to use our sewing skills to make a meaningful difference in our community.
